4. Brokenness
5. One Foot Out Of Hell
6. Pale Fire
7. Death Letter
8. Loaded Gun
9. Faith As A Virus
10. Lost Art Of Heaping Coal

Overview:

Taking the innovation of a "contempo-noise" alternative genre and joining it with the fundamental excellence of bands like Converge, Deadguy and Zao, Wrench In The Works has honed a style of progressive music that is genuinely unique and savagely majestic. A sound which is brutally aggressive joins with well-written metal-influenced-hardcore to show its unabashed rebellion against the genre's restricting conventions. As experimental metal begins to flow with the mainstream, Wrench In The Works desists from the gimmicks that plague the stage during so many metal-hardcore hybrid shows, allowing the unconventionality of their writing to shine through.

Wrench In The Works' accomplishments have exceeded the status quo of the average underground band. The release of their 2005 full-length, "Prodigal Transmission," took the band on their first self promoted national tour as well as an eastern Canadian tour and countless weekend shows, continuously teaming up with a broad range of bands. With seemingly limitless ingenuity and passion, Wrench In The Works will continue shattering eardrums as well as genre barriers as they are prepare to tour full time on their Facedown debut "Lost Art Of Heaping Coal".
